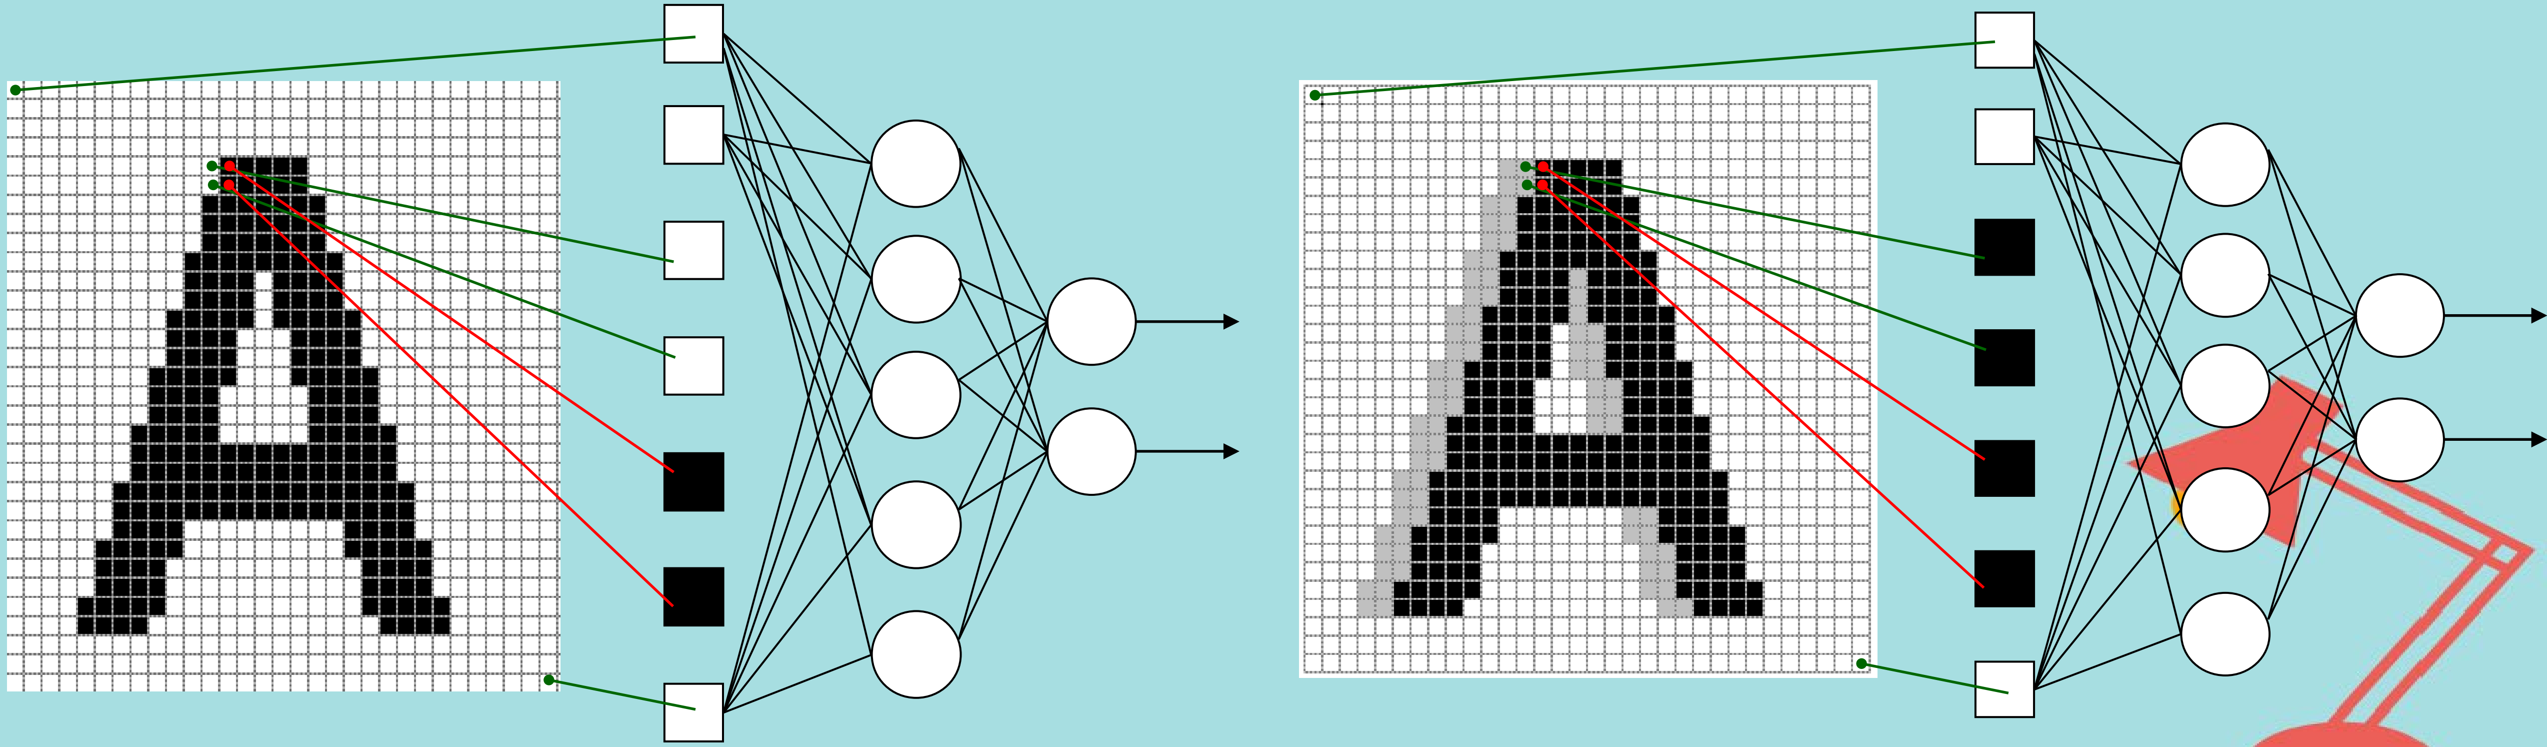
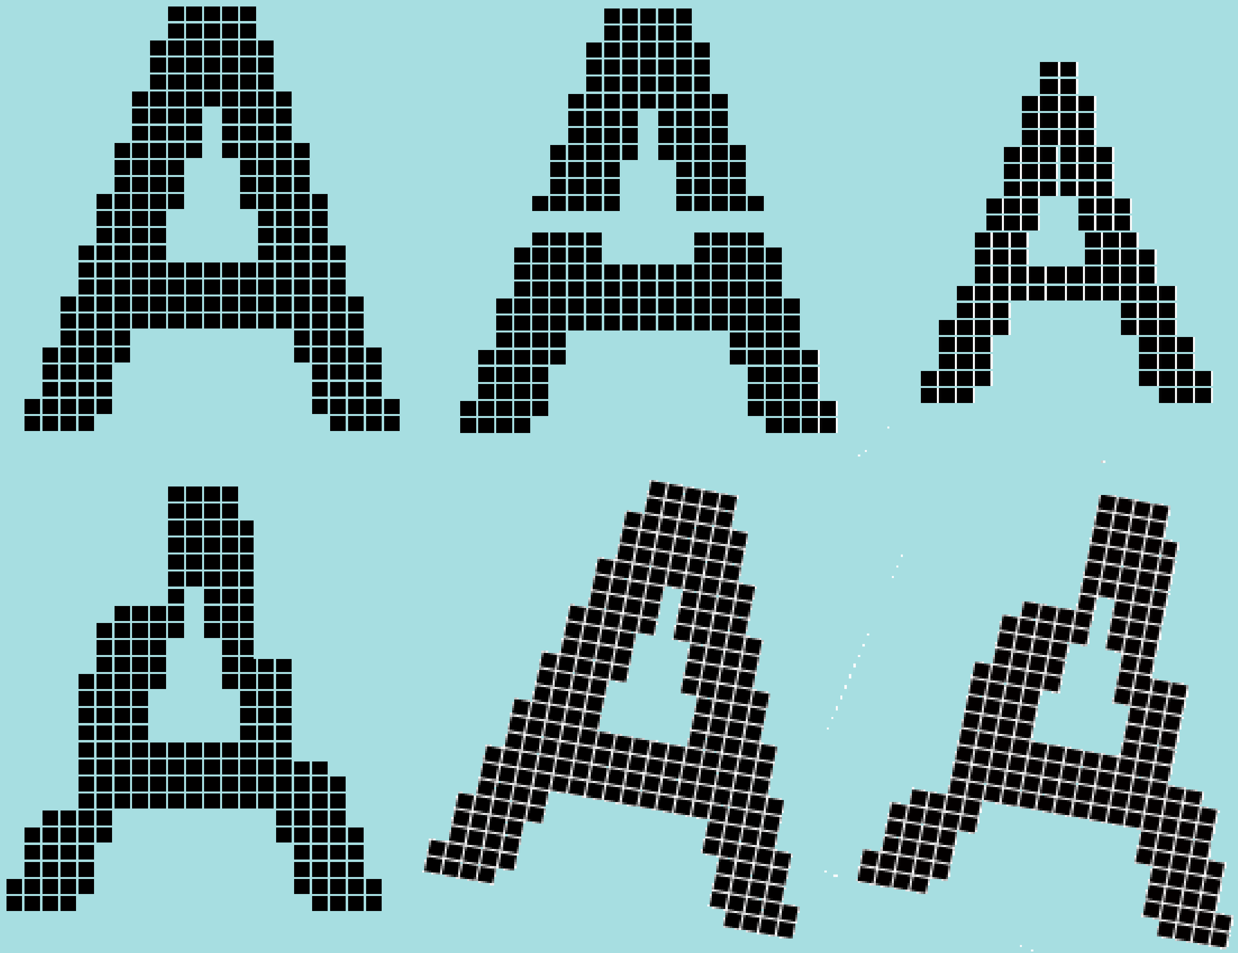
  - Training a CNN model for MNIST dataset

Drawbacks of Feed Forward neural networks

Little or no invariance to shifting, scaling, and other forms of distortion



Scaling, and other forms of distortion



CNN History

Yann LeCun, Professor of Computer Science
The Courant Institute of Mathematical Sciences
New York University
Room 1220, 715 Broadway, New York, NY 10003, USA.
(212)998-3283   yann@cs.nyu.edu

In 1995, Yann LeCun and Yoshua Bengio introduced the concept of convolutional neural networks.

Convolutional neural network(CNN)

Add convolution and pooling layers before feedforward neural network

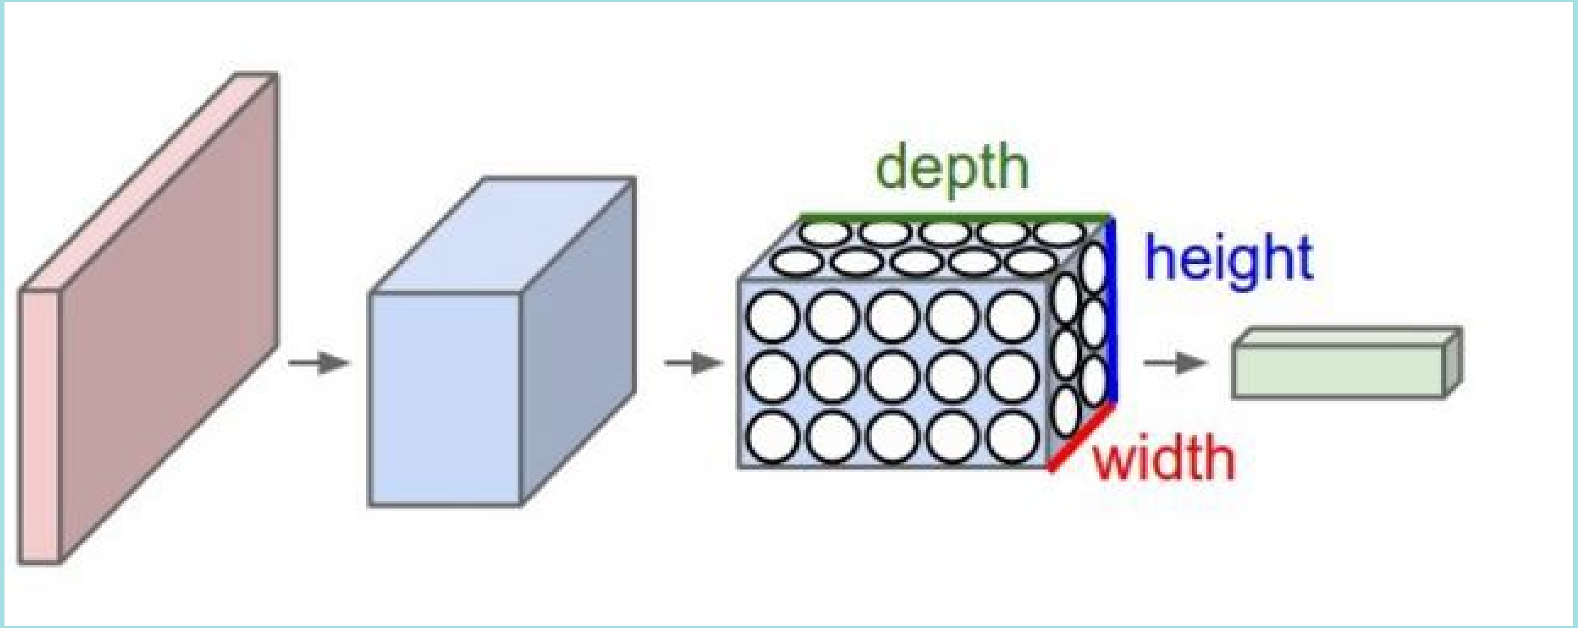
Convolution

Pooling

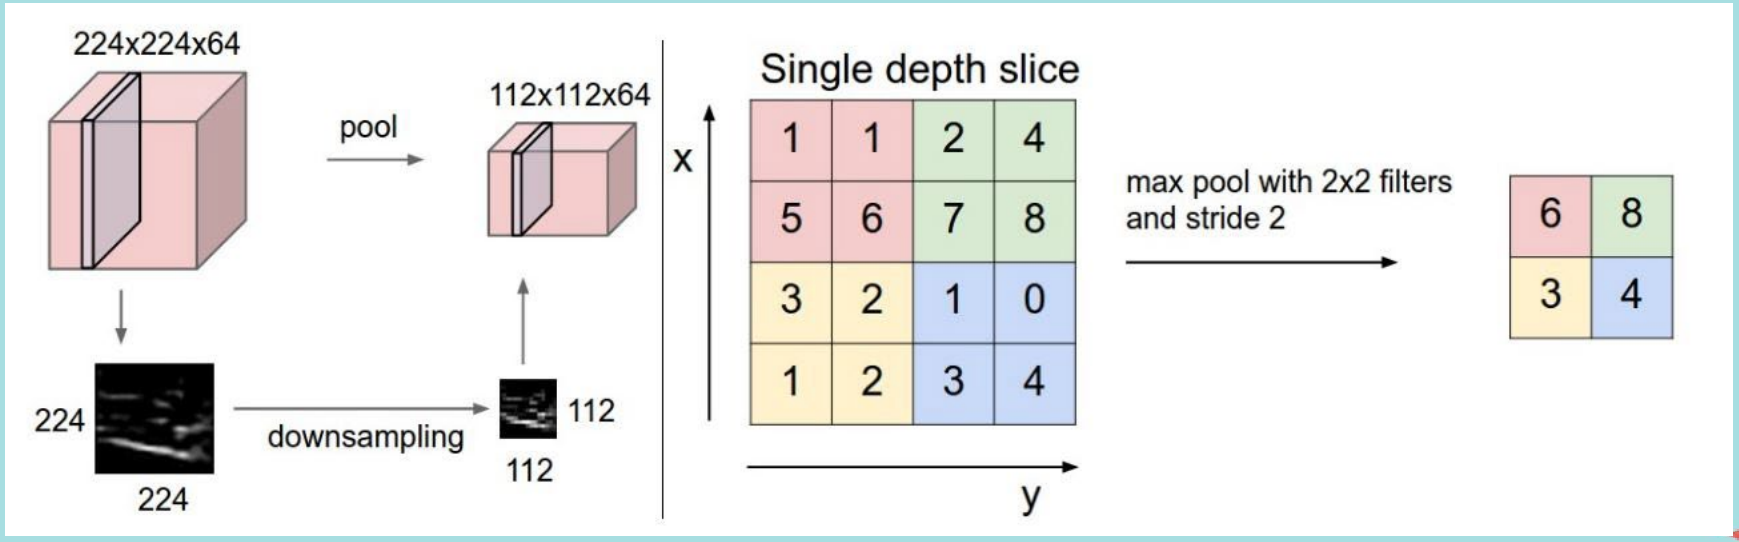
```
keras.layers.Conv2D(filters, kernel_size, strides=(1, 1),
padding='valid', data_format=None, dilation_rate=(1, 1),
activation=None, use_bias=True,
kernel_initializer='glorot_uniform', bias_initializer='zeros',
kernel_regularizer=None, bias_regularizer=None,
activity_regularizer=None, kernel_constraint=None,
bias_constraint=None)

keras.layers.MaxPooling2D(pool_size=(2, 2), strides=None,
padding='valid', data_format=None)
```

Convolutional layer



Pooling layer



Convolution

These are the network parameters to be learned.

1	0	0	0	0	1
0	1	0	0	1	0
